WOOD VENEER

PRODUCT DATA

Wood Veneer combines exceptional durability with the warmth and richness of real wood. Whether prominently featured or used as an accent, our standard veneers offer versatile options for walls, columns and elevator interiors.

PRODUCTS & APPLICATIONS

DESCRIPTION	F+S SYSTEMS
• Wood veneer is a naturally sourced product so variations in color and grain patterning may occur. • All veneers are finished with three coats of CAB acrylic lacquer for superior abrasion resistance and non-yellowing performance while maintaining the richness and authenticity of genuine wood. The finished surfaces have a satin-like appearance. • Standard veneer sizes are 48" x 120" (1,219mm x 3,048mm). • Custom sizes may be available for an additional charge and may require a longer lead time. Please call to discuss the specific needs of your request. • Veneers are available exclusively in the F+S Systems listed at right.	• LEVELr Wall Cladding System • LEVELr Column System • LEVELr Elevator Interiors • LEVELe Wall Cladding System • LEVELe Column System • LEVELe Elevator Interiors • LEVELc-2000 Elevator Interiors

STANDARD VENEERS

Due to the inherent characteristics of wood veneer, significant variations in color and grain patterning between any issued control samples, compared to, as well as within, actual production runs should be anticipated.
