PRODUCT DATA

LINQ™ WOVEN METAL

PRODUCT DATA

Linq Woven Metal brings a distinctly F+S twist to woven metal. Shaped by innovative design and material capabilities exclusive to Forms+Surfaces, Linq unites modern aesthetics, exceptional durability, and full integration with our wall systems, columns, elevator interiors and more.

MATERIAL DESCRIPTION

Linq Woven Metal selections are defined by three basic parameters:

MATERIAL	PATTERN	PATINA
The metal wire used. All patterns are available in stainless steel.	The distinctive texture or design created by weaving the metal. Standard Linq patterns are shown in on pages 2-3.	A contrast-enhancing surface treatment applied to the woven metal. Select patterns are available with a patina, as indicated on pages 2-3.

MAINTENANCE & APPLICATIONS

MAINTENANCE	F+S SYSTEMS
For routine cleaning of Linq Woven Metal patterns in Stainless Steel, spray a commercial cleaner specifically formulated for stainless steel onto a clean microfiber cloth and wipe the surface. We recommend Weiman® Stainless Steel Spray or Magic Stainless Steel Cleaner. After cleaning, the surface should be rinsed with water to prevent streaking and dried with a clean microfiber towel.	<ul style="list-style-type: none">• LEVELe Wall Cladding System• LEVELe Elevator Interiors• LEVELe Column System• LEVELc Elevator Interiors
