

ARCHITECTURAL SURFACES

CARE & MAINTENANCE

VIVIDGLASS™

VividGlass surfaces can be maintained using standard commercial, non-streaking cleaners and polishes formulated for use on glass.

BERMANGLASS™

BermanGlass kiln cast glass surfaces can be maintained using standard commercial, non-streaking cleaners and polishes formulated for use on glass. BermanGlass Resin can be maintained using Novus® plastic and acrylic cleaners. Smudges, or minor scratches can be treated with Novus #2 Fine Scratch Remover. For more aggressive scratches, Novus #3 Heavy Scratch Remover, followed by Novus #2 Fine Scratch Remover should be used.

LIGHTPLANE™ PANELS

For routine cleaning of Forms+Surfaces LightPlane panels, spray a commercial, non-streaking cleaner specifically formulated for use on glass onto a clean microfiber cloth and wipe the surface. Do not apply liquids directly to the glass surface as this may cause damage to LEDs and internal electronics.

STAINLESS STEEL & FUSED METAL®

Fingerprints, smudges and more persistent dirt can be removed by using a solution of Simple Green and water, with a microfiber cloth, as instructed on the Simple Green label. Rinse with plain water and a clean microfiber cloth for a streak-free finish. Do not use harsh abrasives, acids or chlorine-based cleaners or cleaning tools containing carbon steel, such as steel wool or wire brushes. Heavier soiling or superficial discoloration can be removed using a paste of baking soda on a damp sponge or Scotch-Brite™ light duty cleaning pad. Rub the surface gently and evenly and then rinse with fresh water. Dry with a soft cloth. Stainless steel's bright appearance can be maintained by occasional polishing with a soft cloth dipped in common household white vinegar. Commercial products specifically formulated for stainless steel such as Weiman® Stainless Steel Spray or Magic Stainless Steel Cleaner may also be used.

STAINLESS STEEL WITH CERAMILOC™

Stainless Steel with CeramiLoc Treatment should be maintained by wiping the surface with a clean microfiber cloth and water.

ELEMENTAL METAL™

Fingerprints and smudges can be removed using a non-chlorinated spray cleaner/degreaser such as Simple Green® and a microfiber cloth. Do not use harsh abrasives, acids or chlorine-based cleaners or cleaning tools containing carbon steel, such as steel wool or wire brushes.

LINQ™ WOVEN METAL

For routine cleaning of Linq Woven Metal patterns in Stainless Steel, spray a commercial cleaner specifically formulated for stainless steel onto a clean microfiber cloth and wipe the surface. We recommend Weiman® Stainless Steel Spray or Magic Stainless Steel Cleaner. Fingerprints, smudges and more persistent dirt can be removed by using a solution of Simple Green and water, with a soft brush, as instructed on the Simple Green label. After cleaning, the surface should be rinsed with water to prevent streaking and dried with a clean microfiber towel.

BONDED METAL® & BONDED QUARTZ™

Bonded Metal & Bonded Quartz require very little maintenance. Routine dust should be removed by periodic vacuuming or with a soft brush. Fingerprints, smudges and more persistent dirt can be removed by using an ammonia-free cleaner/degreaser such as Simple Green.

WOOD VENEER

Veneer surfaces can be maintained using standard commercial cleaners and polishes formulated for use on interior woods.
