**COLUMN TABLE**

**SURFACE MOUNT INSTALLATION INSTRUCTIONS**

**MATERIALS INCLUDED**

- Attach base to column
- Attach table top to column
- Mark and drill anchor hole

**TOOLS NEEDED**

- Pencil
- 1/2” nut driver
- 3/16”, 3/8” & 5/8” drill bits for concrete
- 3/16” hex key
- Hammer drill
- 1/4” punch
- Hammer
- Steel wire brush
- Pencil
- 1/4” punch
- Hammer

---

**FOR ALL SURFACE MOUNTED COLUMN TABLES**

1. **Attach base to column**
   - Use 3/16” hex key to attach base to column using 5/16”-24 x 3/4” flat head cap screws (a).

2. **Attach table top to column**
   - Use drill with 1/2” nut driver (or socket wrench with 1/2” socket) to attach table top to column with 5/16”-18 x 3/4” hex head bolts (b).

3. **Mark and drill anchor hole**
   - Locate desired position for center of table on ground and mark with a pencil. Use hammer drill to drill 2-1/4” deep x 5/8” diameter anchor hole at marked location using a 5/8” drill bit suitable for concrete drilling.
   
   **NOTE:** Forms+Surfaces recommends starting holes with 3/16” diameter drill bit followed by 3/8” and finally 5/8” for maximum accuracy.
Insert and set anchor

- Use compressed air and steel wire brush to clean anchor hole.
- Insert 1/2"-13 x 2" anchor (d) into anchor hole and use hammer to tap anchor top flush with ground level.
- Use 1/4" punch and hammer to set anchor by driving down the center of anchor until it stops.

Insert all-thread rod

- Thread 1/2"-13 x 3" all-thread rod (e) into anchor until it stops.

Attach table

- Carefully position table on top of all-thread rod and slowly rotate table clockwise until flush with ground.
