STEP BY STEP FOR ALL SURFACE MOUNTED FOUNDATION BENCHES WITH INTEGRAL METAL ENDS

1. Mark hole locations
   • Place bench in desired location. Mark center of each hole location with a pencil.

2. Drill holes
   • Use hammer drill to drill 1-7/8" deep x 1/2" diameter anchor hole at each marked location using a 1/2" drill bit suitable for concrete drilling.
   > NOTE: Forms+Surfaces recommends starting holes with 3/16" diameter drill bit followed by 3/8" and finally 1/2" for maximum accuracy.

3. Insert & set anchors
   • Use compressed air and steel wire brush to clean each anchor hole.
   • Insert 3/8"-16 x 1-1/2" anchor (a) into each anchor hole and use hammer to tap anchor tops flush with ground level.
   • Use 1/4" punch and hammer to set anchors by driving down the center of each anchor until it stops.
**Position bench**
- Position bench so that mounting holes line up with anchors.

**Attach bench**
- Slide 3/8\" stainless steel lock washer (c), then 3/8\" stainless steel flat washer (d) and 3/8\" nylon flat washer (e) onto each 3/8\"-16 x 1\" tamper-resistant button head cap screw (b).
- Insert screws into mounting holes in bench and thread into anchors using provided 7/32\" hex bit for tamper-resistant screws.

**Tighten screws**
- Tighten screws until snug.
