The LEVELe Column System was designed to accommodate a wide range of field conditions without sacrificing ease of specification, installation, maintenance, or breadth of material choices. Aluminum-framed panels with structural backing and decorative insets form the basis of the system. Four highly configurable panel styles - Minimal, Capture, Blind and Float - allow our full palette of materials, as well as third-party materials, to be used as insets. Outside corners, bases, and self-revealing extruded aluminum mounting channels complete the system. For design continuity throughout a space, the LEVELe Column System coordinates with our LEVELe Wall Cladding System and LEVELe Elevator Interiors. In addition, many of the high-performance F+S materials available for LEVELe are also available with F+S doors, door frames, elevator door skins, sheet goods and more.

The LEVELe Column System is assembled using a series of individual panels whose sizes and shapes vary depending on the specification and field conditions, by using the same components and techniques as for the LEVELe Wall System. LEVELe Column panels and corner components have sufficient tolerances built into them to accommodate rectangular and square column dimensions and conditions.

### STANDARD INSET MATERIAL OPTIONS

<table>
<thead>
<tr>
<th>VIVIDGLASS</th>
<th>BERMANGGLASS® LEVELS™ KILN CAST GLASS</th>
<th>STAINLESS STEEL</th>
</tr>
</thead>
<tbody>
<tr>
<td>VividGlass laminated glass has tremendous creative potential. Offering numerous ways to transform spaces with colors, patterns and graphics, many of our VividGlass designs can be specified as panel insets including selections from our VivChrome, VivGraphix, VivSpectra, VivStone, VivStrata and VivTela families. Please refer to the individual VividGlass Product Data Sheets for swatches and additional information.</td>
<td>BermanGlass Levels glass is artisanal kiln cast glass laminated with color and graphic interlayers. Captivating and dynamic, Levels designs bring creative plays of texture, color and light to walls, columns, elevator interiors and more. Please refer to the BermanGlass Levels Kiln Cast Glass Product Data Sheet for design swatches and additional information.</td>
<td>Stainless Steel in all of our standard finishes can be specified for panel insets. A variety of optional patterns, applied to the stainless steel/finish combination, can also be specified for added visual interest and enhanced functionality. Impression and Fusion patterns offer a wide array of standard designs and vast customization potential. Please refer to the Stainless Steel Product Data Sheet for finish and pattern swatches and additional information.</td>

<thead>
<tr>
<th>FUSED METAL®</th>
<th>ELEMENTAL METAL™</th>
<th>LINQ™ WOVEN METAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>LinQ is Forms+Surfaces’ answer to woven metal CrossLinQ patterns consist of flat and/or round wires interwoven to create distinctive textures and designs. CrossLinQ patterns emphasize Stainless Steel, though Brass may be specified on a per-project basis. Please refer to the LinQ Product Data Sheet for additional information.</td>
<td>Elemental Metal pairs the performance benefits of stainless steel with the timeless beauty of oxidized metal. The oxidizing process darkens the color of the stainless steel and creates organic variations in the material’s finished appearance. The standard color: Elemental Carbon, is a blackened stainless steel; the standard finish is Ice. An invisible sealer protects the oxidized surfaces. Please refer to the Elemental Metal Product Data Sheet for complete information.</td>
<td>Bonded Quartz combines ceramic microspheres and a fiber-reinforced polymer matrix to form a material that is lightweight, durable and easy to clean. Standard colors are White and Charcoal; custom colors are also available. A variety of sculptural patterns complete the design options. Please refer to the Bonded Quartz Product Data Sheet for complete information.</td>

** Some patterns may require a backing material for use in the column system
*** Minimal and Capture panels are also available in our LEVELe Wall Cladding and Elevator Interior Systems

Customers sometimes wish to specify their own inset materials to match lobby walls or other areas on specific projects. This is generally feasible, provided the materials meet certain dimensional requirements. Please call for more information.
STANDARD COLUMN SYSTEM COMPONENTS

Panel details shown are for Minimal panels and will vary for Capture, Blind, and Float panels. The LEVELe Column System is designed using the LEVELe Wall Cladding System components. System components are the same for all panel types.
**MINIMAL PANEL**
Minimal panels have a narrow frame detail, forming a minimal appearance around the inset material.

**CAPTURE PANEL**
Capture panels accommodate thicker, heavier materials, such as glass, that require a frame with a capture edge.

**BLIND PANEL**
The Blind panel framing system is not visible from the front of the panel, helping to create the illusion of material thickness.

**FLOAT PANEL**
Float panels incorporate a non-visible framing system that leaves panel edges exposed.
SYSTEM COMPONENTS

WALL PANELS

- Panel frames are extruded aluminum. All panel frame corners are mitered.
- Minimal and Capture panel frames are available in Clear, Black, or Antique Bronze anodized finishes.
- Float and Blind panel frames are available in Black anodized finish only.
- Panel insets consist of a decorative face material bonded to a structural substrate. Inset material options vary by panel type. (Refer to table on page 2)

PANEL SUBSYSTEM

- Panel frames serve as the framing elements for the insets and incorporate LEVELe’s innovative panel attachment system.
- Reveals are extruded aluminum and are standard in black; additional colors are available for an additional fee.
- Standard bases consist of a Stainless Steel or Fused Metal cover applied to an extruded aluminum substrate with pre-applied mounting adhesive. Stainless Steel and Fused Metal finish options are available in the LEVELe Wall Cladding Systems Design Guide. If you would like to use your own base, the system can be provided without a base.

CORNER EXTRUSIONS

Outside Corner
- Minimal & Capture Panels: extruded aluminum corners are available in Clear, Black or Antique Bronze anodized finishes to match panel frames.
- Blind & Float Panels: extruded aluminum corners are available in Clear or Black anodized finishes. Facing material that complements the panel inset material is also an option; contact F+S for details.

DELIVERY & INSTALLATION

DELIVERY
Panels, bases and reveals for each individual column arrive in a single crate, unless glass panels are required. Glass or LightPlane Panels will be packaged separately in A-frame crates, making it easy to organize materials on site. The crate arrives with components neatly organized and includes all the necessary fasteners, adhesives and installation instructions.

COLUMN PANEL INSTALLATION
LEVELe installation is designed to be straight-forward and efficient. LEVELe Columns are easy to install and arrive dimensioned to specified project specifications. Many field conditions can be accommodated by adhering to the following installation sequence:

• First, the vertical hat channel extrusions are attached with self-tapping screws to the column substrate, shimming as required to establish a planar basis for the column system.
• The corner extrusions are set next and leveled to the plane just created.
• Next, the base cleat extrusion is installed, followed by the wall reveal cleat extrusion, and finishing with the top cleat, working up the wall.
• Vertical reveals are then attached in the corners and affixed to the hat channels.
• Lastly, the panels are engaged via a French cleat system. Note: panels can be installed and replaced independently and in any order.

PANEL REPLACEMENT
If panels are ever damaged due to accident or vandalism, replacement panels can be ordered from Forms+Surfaces. The attachment system permits one panel to be removed without disturbing those around it, keeping downtime to a minimum.

RELATED PRODUCTS

LIGHTPLANE PANELS
LightPlane Panels are engineered LED edge-lit panels that are a standard offering in our LEVELe Column System - allowing you to seamlessly illuminate columns and more. LightPlane Panels have the same visible profile as Capture panels and are available exclusively with a wide range of our VividGlass and BermanGlass Levels Kiln Cast Glass products. Please refer to the LightPlane Product Data Sheet for pattern options and additional information.

LEVELe ELEVATOR INTERIORS
LEVELe Elevator Interiors incorporate Minimal and Capture panels and are available in many of the materials and finishes offered for the LEVELe Column System. Please refer to the LEVELe Elevator Interior Product Data Sheet for additional information.

LEVELe WALL CLADDING SYSTEM
The LEVELe Wall System is available in the same four panel types and the same materials and finishes as those offered with the LEVELe Column System. Please refer to the LEVELe Wall Cladding System Product Data Sheet for additional information.

DOORS
Forms+Surfaces manufactures a full range of entrance doors and door pulls in materials and finishes that complement those offered for LEVELe Walls, Columns, and Elevator Interiors. Please refer to the Door Product Data Sheets for additional information.

ELEVATOR DOOR SKINS
Forms+Surfaces Elevator Door Skins are available in many of the same materials and finishes as those offered for LEVELe Walls, Columns, and Elevator Interiors. Please refer to our Elevator Doors Product Data Sheets for additional information.

ARCHITECTURAL ACCENTS
Coordinating sheet goods are available for headers, jams, returns, transoms and other architectural features. Our litter & recycling receptables, site furnishings, and other amenities are also available in many of the materials and finishes offered for LEVELe Walls, Columns, and Elevator Interiors.

CUSTOM COLUMNS
If your design requirements go beyond the standard LEVELe configurations or material and finish options, customized variations are available for an additional charge. Please call us to discuss your needs.

TECHNICAL SUPPORT & PROJECT MANAGEMENT
Because each project is unique, our knowledgeable support team is ready to help. Our technical sales, engineering, sustainability, and project management professionals regularly assist our clients worldwide. Please contact us at 800.451.0410 or sales@forms-surfaces.com to discuss your project.

HOW TO SPECIFY
A Design Guide is available to lead you through the specification process in a simple, checkbox format. The Design Guide captures all the information needed to generate a quote: configuration, dimensions, finishes, patterns and other options. To get started, just give us a call or visit us at www.forms-surfaces.com.
