SLOT MOUNT STANDOFF GLASS HARDWARE

Slot Mount Standoffs can be used with our BermanGlass and VividGlass lines. Slot Mount Standoffs are designed for mounting glass vertically and horizontally—as with partition panels, signage or shelving—without drilling holes in the glass. Standoffs are available in five finishes for three glass thicknesses. Complementary accessories are also available for other types of glass mounting and installation. Because every application is unique, we recommend contacting our project management team for help with your project’s specific requirements.

**PRODUCTS & APPLICATIONS**

**PRODUCTS**
- Slot Mount Standoffs can be used with our BermanGlass and VividGlass lines.
- Designed for use with standard glass thicknesses of 1/4" (6.3 mm), 3/8" (9.5 mm), or 1/2" (12.7 mm)

**APPLICATIONS**
- Mounting glass partition panels, signage, shelving, and accent pieces.
- Due to the diversity of applications, weight limitations for Slot Mount Standoffs are dependent upon wall or substrate anchoring and material strengths.
- Please contact us for your project-specific needs.

HOW TO SPECIFY
Slot Mount Standoffs can be selected on each of the BermanGlass and VividGlass Design Guides. The detailed drawings in this document are general representations only, the exact layout and quantity required are to be determined based on the actual installation requirements. Please contact our project management team for questions on your project specifications.
